

## Clinical Market Research Participation Information Sheet

Thank you for your interest in participating in our market research.

**About Us:** NanoCube Health, a Melbourne-based start-up, is in the early stages of work to transform cancer diagnostics and treatment with high performance, next generation nanorobotics technology designed with the aid of Artificial Intelligence to improve patient and public health outcomes by:

- Avoiding or delaying the onset of chronic disease through earlier diagnosis and intervention;
- More precisely diagnosing and treating cancer via targeted, non-invasive technology;
- Significantly reducing side effects from healthy tissue being indiscriminately damaged
- Reducing the need for invasive surgery, and
- Reducing treatment and recovery time.

Please take a moment to review the following information before deciding to participate:

### 1. Study Details:

**Eligible Participants:** We are seeking participation from Oncologists (Medical, Surgical or Radiation), Neurosurgeons, Radiologists, and Pathologists with experience in cancer diagnosis and/or treatment of solid cancer types.

**Purpose:** The purpose of interviews is to engage clinical experts in thoughtful discussions regarding cancer diagnostics and treatment. We aim to gather insights and perspectives from you, about:

- The strengths and challenges of current cancer diagnostic and/or treatment approaches.
- Key factors that you consider important for future innovation in the area of cancer diagnostics and/or treatment.
- Your perceptions and thoughts on the potential future role of nanorobotics in cancer diagnostics and/or treatment.

**Duration:** The interview will run for approximately 45 minutes.

**Interview Format:** The interviews will be one-on-one between you and a member of our research team. Interviews will be conducted via video conferencing at a time and date convenient to you.

**Recording:** The interviews will be recorded for research purposes. However, if you prefer not to be recorded, please let us know in advance.

**Payment:** Participants may request payment for their time and expertise. If payment is sought, please kindly communicate fees to us in advance of the interview.

**Prior Knowledge:** No specific nanorobotics knowledge is required to participate. All participants, regardless of their level of knowledge in nanorobotics, are welcome to partake in an interview.

## 2. Voluntary Participation:

Your participation is entirely voluntary. You have the right to decline participation or withdraw at any time without any negative consequences.

## 3. Confidentiality and Privacy:

**Identity Protection:** We will ensure the confidentiality of your personal information. Your identity will be protected, and we will assign a non-identifying description to you (e.g., "Medical Oncologist in Victoria with 15 years of experience"), unless you grant us explicit permission to use your name.

**Data Handling:** Any data collected during the interview will be handled in compliance with relevant legislative requirements pertaining to data privacy and protection.

**Reporting:** The findings from the interviews may be used for internal purposes, as well as for presentations, and publications. Any data shared will be aggregated and/or anonymised to prevent identification of individual participants.

## 4. Informed Consent:

If you decide to participate in this interview, you are confirming that you provide informed consent to be included in this market research, and to the handling and usage of your data as described above.

We appreciate your consideration of this opportunity to contribute to the future design of emerging medical technology. Your expertise and insights are invaluable in helping us develop innovative solutions for cancer diagnostics and treatment. If you have any questions or concerns, please feel free to reach out to our team using the contact information provided below. If you wish to participate, please provide your contact details via the online form on our website: <https://www.nanocube.com.au/clinician-feedback>

Sincerely,
